

Statement

About the murders of civilians during raids

THE American forces had committed a lot of violation through illegal practices and these violation are regarded serious crimes according to International humanitarian law because they harmed armless civilians rights and they take many forms to contain serious and savage crimes In most cases , such as premeditated murder , arbitrary detention , terrify safe persons , excessive using of military forces , deprivation of civilians from international admitted protection and aggression of private and public properties .

These forces had been recorded a critical violation and criminal act when they had committed a savage crime on Monday falling on 2nd .April. 2007 in AL-Sahha quarter in Mosul. So, after they had attacked the house with fire and bombs at half and tow o'clock after midnight. They had committed a premeditated murder for three civilians of the family (they are the father, his son and from his relatives) with harmed the dignity of others and they had stolen a lot of their properties. then these forces had repeated its crime in another place in Mosul city but the theater of crime was in AL-baker quarter when they had attacked another Iraqi family in their house at fifteen and two o'clock after midnight and the same thing they had committed a new permeated murder resulted in murdering of three armless civilians persons from the family. In spite of all the legal evidences and deposition by witnesses had confirmed that the victims didn't practice any act leads to obstruct American forces working during their attack which had been executed.

These criminal acts and others had strengthened the law facts and documentations

Which had got by the I.O.H.R and which proved that these crimes had been committed before in the city, when these forces had committed also a premeditated murder for four armless civilians there were two children between them and this crime had executed on Thursday falling on 29th .March .2007 at two o'clock after midnight? Thus these forces had been confirmed its way by executing these crimes ignoring all human rights standards and all international laws and traditions.

The I.O.H.R is regarding what happening is a crime as a murder crime executed outside the judicial frame and it is as a premeditated murder under covering international criminal and revengeful acts. consequently, the I.O.H.R reminds the American forces and the other that the common third article in fourth Geneva agreements in 1949 had set forth in first paragraph that the murdering acts classified under international crime, which we couldn't neglecting it or concealing their perpetrators. so, form this starting point the I.O.H.R calls the Iraqi government , American forces and all international establishments to instant , real and just investigation in these crimes in order to illustrate the conditions of these crimes and to prevent repeating in future because of its seriousness and they are incompatible with international human rights standards , such as the international declaration of human rights , the international charter of political and civil rights and national judicial rules for all states.

The I.O.H.R confirms upon the important role of United Nations of human rights council to observe these violations and others in order to reveal the facts, protection the victims, incrimination the acts and punish perpetrators.
